Authorization for this examiner's amendment was given by John R. Mattingly in the telephone call on 7/20/05. The application has been amended as follows:

Claims 1, 2, 11, 12, and 15 have been cancelled as being drawn to a non-elected method and apparatus and there is no allowable generic or linking claim.

Claim 14, line 6, "omitted" has been changed to --emitted--. On line 12, "first controller" has been changed to --a first controller--. On line 14, "second controller" has been changed to -- a second controller--. On line 16, "said controller" has been changed to --said first controller--.

## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art of record does not teach or render obvious the claimed apparatus for a charged particle beam, according to independent claim 14, comprising the combination of a first controller to control a voltage to be applied to said probe and a second controller to control the location of the probe with said first controller controlling a polarity of the voltage to be applied to the probe depending on a polarity of the charge of the sample.
